Bob,

    Seems to me it would be worth-
while hitting ▭ on this.
Why didn't they ask us?

MEMORANDUM FOR: Acting Director, Foreign Broadcast Information Service

FROM: STAT

Chief, Advanced Development Division, ESG

SUBJECT: Lockheed Electronics Company (LEC) Meeting With OMB

    1.   On 30 October, Dick Lipnick told me he had met with OMB to present a LEC capabilities briefing because a local Lockheed representative had told him that OMB was looking for companies to develop an OMB support system. He said that the OMB representatives had asked questions about FBIS Modernization.

    2.   After reporting this conversation to you, I asked him to supply further details. His answer is attached.

    3.   If we need further information, please let   AC/ADD   STAT
(4-7 November) know and she will contact LEC.

STAT

Attachment:
  As stated

Lockheed Electronics Company, Inc.

3 November 1986

STAT

As per your request over the telephone for information on our meeting
with OMB for yourself and [ ] I present the following. The meeting
took place on Friday, 24 October 1986 with OMB representatives Arnold
Donahue and Russell Neely. LEC gave a presentation on its general office
automation and communications capabilities. Included in this were slides
on the AFS program. OMB had specific questions about the AFS, some of which
were answered while others were referred to your office. Those that were
answered included:

STAT

1. Where and how do the field bureaus get their information?
2. How many bureaus are there?
3. Is the headquarters equipment being installed?
4. What is LEC's real involvement and how are they different from LMSC?
5. Why was the HQ Unclassified system accelerated?

Questions that were answered superficially or referred directly to your
office were as follows:

1. What is the need for softcopy? What are the number of users? What is
    being planned? What is the viability of softcopy? Isn't everything
    presently sent out on wire service now? Do you really need JPRS on
    softcopy?
2. What are we doing to automate P&PD?
3. Why didn't SAFE want JPRS products?

If you have any further questions on these please contact myself or Denis
at your convenience.

Sincerely,

Richard Lipnick
